

Agenda item 24 Proposal of work to Nottingham Road Car Park Lighting

The leisure centre is open until 9pm in the winter months and the office received various complaints from residents and leisure centre users regarding the lack of lighting

In the Autumn last year a company was commissioned to test the lights at Nottingham Road Car Park.

The lights failed inspection and the company was asked to quote for repair.

Despite numerous attempts to obtain a quote this was not forthcoming.

A further quote has been obtained as follows:

Replace floodlights in long stay car park and repair/ replace lamppost column cover

50w LED photocell floodlights - black, Asymmetrical anti light pollution lens, 54k hours

Replacement column door 1

£1975.00

There is still 1 light column in dispute which is on land between and leisure centre and the car park. The proposal does not include this.

Proposal

To accept the quote of £1975.00 to repair and replace lights/column in Nottingham Road Car Park.

Recommend to Full Council the funding is allocated 50% from 312 Maintenance Reserve and 316 Car Park Reserve
